Re: Pipeline Safety Evaluation
Inspection Package Number: INSPPKG-0000124657
UNIT OF COMPANY ID 3524

(All correspondence must include the Inspection Package Number)

Dear Robert S. Barnwell, IV:

Recently, a safety evaluation was conducted of pipeline facilities operated by your company. These facilities are identified in the attached Safety Evaluation Summary. Safety evaluations are conducted in accordance with the pipeline safety requirements of Tex. Util. Code §121.201 for natural gas and other gas pipeline facilities and Tex. Nat. Res. Code §§117.001 and 117.011 for hazardous liquid pipeline facilities.

During the evaluation, selected physical conditions, written procedures, and records were reviewed. At the time of this evaluation, no alleged violations of the applicable safety regulations were found in the areas reviewed.

Your efforts to maintain the pipeline facilities have resulted in this favorable report. We appreciate the assistance given during the investigation. If you have any questions, please do not hesitate to contact the Oversight and Safety Division by email at safety@rrc.texas.gov

Sincerely,

Stephanie Weidman
Pipeline Safety Director

INSP-00001686 77	000377 SYSTEM OF COMPANY ID 3524	Non-Physical System	0	0	0	0

Important Note: The pipeline system(s) listed above are identified by a number and name and represent the physical pipe, valves and other components operated by your company. Additionally, there may be a pipeline system listed that is named System of Company ID Number where number is the identification number of your company. This system is used to represent your company and does not represent any physical pipeline system. For internal purposes it allows the Commission to more properly record inspection work performed at the company level. Where deficiencies are found in programs, plans, procedures, and records at the company level and are not with a specific physical system, alleged violations will be cited against the System of Company ID Number.
